BUT THERE ARE VILLAINS (BUSINESS RISKS)

**Zerodha has done VERY WELL in last
two years but some big risks are there**

HIGH BETA BUSINESS

Brokerages do well in Bull Runs

Recessions mean lesser investors and lower commissions

Already the number of new accounts opening has halved

BLACK SWAN EVENTS

ZERODHA makes most of the money from F&O and intraday trades

They run the risk of trade loss being higher than the margin requirement

Example - When Crude went negative they lost Rs. 30 Crore

GBP INR moved 4% while margin requirement was 2%. They paid rest

**MARKETS WOULD KEEP
MOVING UP/DOWN**

**AND SO WOULD
ZERODHA'S PROFITS**

WOULD STAY COOL
AND FOCUS ON THEIR
BUSINESS**
